SECRET/NOFORN-SKEET CHANNELS ONLY

## PROJECT SUN STREAK (U)

## WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

Session Procedures Report (S/NF/SK)

PROJECT NUMBER: 8709

SESSION NUMBER: 3

DATE OF SESSION: 19 AUG 87 TARGET COUNTRY:

REFERENCE:

MISSION STATUS:

TECHNIQUE UTILIZED: CRV

SOURCE IDENTIFIER: 011

- 1. (S/NF/SK) Monitor Tasking: Monitor was instructed to concentrate efforts upon the US aircraft, particularly with regard to material and configuration; sketching was to be encouraged.
- 2. (S/NF/SK) Source Tasking: Source was informed that the entire session would entail a Stage VI exploration of the "pointed object". Early in the session, the Source was told that the AOL of "SR-71" was actually AOL matching; that the target was indeed an aircraft.
- 3. (S/NF/SK) Summary: Source's summary attached. Initially, each time the Source attempted to perceive parts of the target, a double image would be perceived, i.e., two different tails, wings, etc., "as if two different versions of the target existed". The monitor directed the Source to separate these overlays and to sketch each separately, labeling them as Version 1 and Version 2. Unfortunately, Source (at this time) is not certain about to which version other perceived descriptors apply.
- 4. (S/NF/SK) Comments: As usual, while lacking in quantity of data, the quality of this Source's work is high. Monitor's intent is to use this session as a jump-off point for the production of much more target data.

SESSION SUMMARY

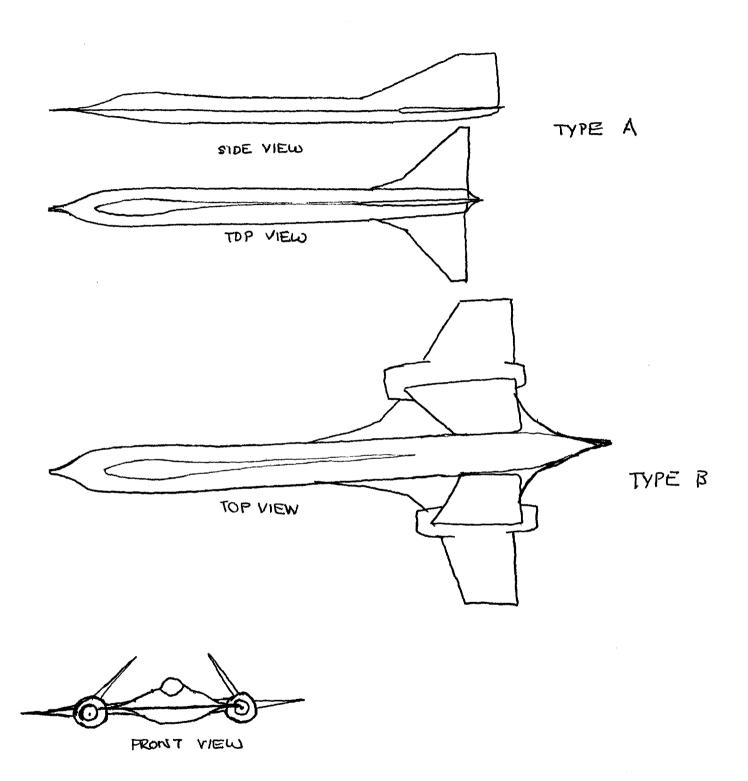

SESSION: 19 AUG 87, 0825-0917 hrs

There is a pointed object which appears gray in color. It is metallic and is coated with something (AOL-like diamond dust). The surface is tured, but smooth with a matte finish. Looking at this object from the front, it takes on a somewhat elangated diamond shape. The element Titanium is important to this object. The shape of this object is aerodynamic (AOL-like SR-71/Space Shuttle). The fiselage itself provides lift, thereby reducing the amount of wing surface necessary.

There seems to be some confusion as to the tail configuration and the location of the engines (see sketch, type A and B).
